

BERETTA

APX Combat - 9mm

The Beretta APX Combat is a further evolution of our popular APX striker fired duty pistol. It incorporates the ability to easily mount a Red Dot Optic on your slide and a suppressor or compensator on the factory installed threaded barrel. The Beretta APX Combat striker-fired semiautomatic pistol, utilizing a removable internal metal chassis, can be easily modified with replaceable grip frame housing and is simple to disassemble and maintain. The extremely low profile, snag-free, design of the APX makes it easy to carry and draw from the holster. To accommodate right or left-handed use, the magazine release button can be easily reversed while the hold-open lever is present on both sides of the gun. Furthermore, to enhance the pistol ergonomics, the APX is fitted with quickly interchangeable backstraps of different thicknesses to accommodate most users' grip.
