

BERETTA

APX Compact - 9mm

The Beretta APX Compact pistol extends the proven APX Series to a concealed carry friendly size. The Compact has been designed specifically for military and law enforcement users who have a need to carry concealed but want similar handling characteristics to their duty pistols. The Beretta APX Compact striker-fired semiautomatic pistol, utilizing a removable internal metal chassis, can be easily modified with replaceable grip frame housing and is simple to disassemble and maintain. The extremely low profile, snag-free, design of the APX makes it easy to carry and draw from the holster. To accommodate right or left-handed use, the magazine release button can be easily reversed while the hold-open lever is present on both sides of the gun. Furthermore, to enhance the pistol ergonomics, the APX is fitted with quickly interchangeable backstraps of different thicknesses to accommodate most users' grip.
