

BERETTA

APX Carry - 9mm

The Beretta APX Carry has been designed specifically for military and law enforcement users who have a need for ultra-concealment but want similar handling characteristics and ergonomics to their duty pistols. The Beretta APX Carry striker-fired semiautomatic pistol, utilizing a removable internal metal chassis, can be easily modified with replaceable grip frame housing and is simple to disassemble and maintain. The extremely low profile, snag-free, design of the APX makes it easy to carry and draw from the holster. To accommodate right or left-handed use, the magazine release button can be easily reversed.
