

BERETTA

92FS

The Beretta 92FS is a double/single-action semiautomatic pistol that employs an open-slide, short-recoil delayed locking-block system, which yields a faster cycle time and delivers exceptional accuracy and reliability. In particular, the open-slide design practically eliminates “stove-piping” and helps flawless cycling and feeding even after thousands of rounds. The 92FS reversible magazine release and ambidextrous safety-decocker make it flexible for right- or left-handed operators.
