## ARX 160 - 11"

The Beretta ARX160 assault rifle has improved efficiency in the field by innovative engineering geared specifically toward the soldier. The ARX160 modular platform features fully ambidextrous controls and a pin-free design. The cocking handle, the magazine release button, the fire selector button, the hold open lever, the folding sock button and the barrel release latch are all designed to be comfortably operated by right- and left-hand users. The ejection side can be reversed from right to left, depending on the user's preferences.
