Fabbrica d'Armi Pietro Beretta

Founded in 1526 and based in Gardone Valtrompia, Italy. Time proven and operationally tested, the centuries have passed and simply underlined Beretta as one of the premium names in the Defense and Law Enforcement segments. Manufacturing the widest range of small firearms in the world from the most state-of-the-art facilities in the industry, the oldest firearms factory and one of the most successful has been passed down through 15 generations of the Beretta family and now exports weapons to over 100 countries.

Beretta's firearms have been adopted as the standard weapon by many armed forces, elite units and law enforcement agencies worldwide. Believed by many to be the greatest pistols ever made, Beretta pistols have redefined the standard for operational reliability. The combination of high tech modern materials and ergonomics have led Beretta to be amongst top players in providing Military and Law Enforcement.

Beretta Defense Technologies

Beretta Defense Technologies is the strategic alliance of four Beretta Holding companies - Beretta, Benelli, Sako and Steiner - that supply services and products to Military and Law Enforcement operators around the world. These companies are globally renowned for decades of expertise and leadership in their respective fields, state of the art machinery and extensive R&D capabilities. Together, they offer one of the most complete offerings in the industry: including various services, firearms, ammunition, optics and electro-optics as well as tactical clothing.

Vision & Mission

We believe the individual Law Enforcement Officer or Soldier is the ultimate system: integrating training, knowledge, and technology to successfully perform his mission. Our mission is to provide him with the solutions needed to improve lethality, survivability, mobility, situational awareness, sustainability, training, and overall mission success, current and future. Through the BOT alliance, Beretta, Benelli, Sako and Steiner propose integrated solutions combining their expertise, and develop integrable solutions that will interface with third-party solutions where needed.

Pistols

APX

Product: The Beretta APX striker-fired semiautomatic pistol, utilizing a removable internal stainless steel chassis, can be easily modified with replaceable grip frame housing and is simple to disassemble and maintain. The extremely low profile, snag-free, design of the APX makes it easy to carry and draw from the holster. To accommodate right or left-handed use, the magazine release button can be easily reversed while the hold-open lever is present on both sides of the gun. Furthermore, to enhance the pistol ergonomics, the APX is fitted with quickly interchangeable backstraps of different thicknesses to accommodate most users' grip.

APX Full Size

Product: APX Full Size dimension are mainly intended for professional service use. It combines 17 rounds capacity magazine, perfect hands fit and a snag proof profile. Hardly tested in any environmental condition, being NATO qualified, APX Full Size was developed to meet professional customers need.

Colors: Frame can be required in different colors such as Black, Wolf Grey, Flat Dark Earth and Olive Drab Green

Notes: APX Full Size features firing pin block safety, trigger safety and out of battery safety as standard. Can be also required with a top slide mount Loaded Chamber Indicator and external thumb safety options.

APX Full Size RDO

Product: APX Full Size RDO features a red dot ready slide which allows operators to mount the main commercially available red dots thanks to the interface adapters developed by Beretta and already included in the box.

Colors: Frame can be required in different colors such as Black, Wolf Grey, Flat Dark Earth and Olive Drab Green

Notes: APX Full Size RDO features firing pin block safety, trigger safety and out of battery safety as standard. Can be also required with external thumb safety option.

APX Full Size Combat

Product: APX Full Size Combat features a red dot ready slide which allows operators to mount the main commercially available red dots thanks to the interface adapters developed by Beretta and already included in the box. Additionally comes with a threaded barrel available in M13,5x1mm or 1/2"-28 UNEF thread to install sound suppressors.

Colors: Frame can be required in different colors such as Black, Wolf Grey, Flat Dark Earth and Olive Drab Green

Notes: APX Full Size Combat features firing pin block safety, trigger safety and out of battery safety as standard. Can be also required with external thumb safety option. With APX Full Size Combat and RDO can be requested with suppressor height sights, which are also suitable for Red Dot co-witness.

APX Full Size Tactical

Product: APX Full Size Tactical slide features a special Flat Dark Earth coating with Beretta AquaTech Shield technology. Frame comes Flat Dark Earth as well so that to complete the desert look of the pistol. Further than the different color APX Full Size Tactical ensure the same proven performance and reliability of APX Full Size.

Colors: Flat Dark Earth

Notes: APX Full Size Tactical features firing pin block safety, trigger safety and out of battery safety as standard. Can be also required with a top slide mounted Loaded Chamber Indicator and external thumb safety options.

APX^{A1}

Product: The APX A1 takes the proven ergonomics and reliability of the APX family to the next level with integrated features derived from feedback from military, law enforcement, and tactical shooters. It aims for the highest levels in performance, safety, and quality to operate for any shooter in the field. APX A1 features a red dot optic ready slide with new aggressive serration, an ergonomic grip with ambidextrous controls and maintains the modularity architecture of APX family.

APX A1 Full Size

Product: Beretta APX A1 takes the proven ergonomics, reliability, and accuracy of the APX family and delivers a superior firing solution to the most demanding professionals in the world. A crisp trigger features a light pull, clean break, and a short reset for fast target engagements. The red dot optic-ready slide lets you easily install a wide range of optics.

Colors: Frame can be required in different colors such as Black, Wolf Grey, Flat Dark Earth and Olive Drab Green.

Notes: Aggressive slide serrations let you rack, and press check even in extreme conditions. The modular frame comes with three integrated backstraps so it can contour to the hands of any shooter in minutes for a better feel and control thanks to the great recoil management.

Submachine Guns

pmx

Product: Beretta PMX Submachine gun is developed specifically for the demanding needs of Law Enforcement and Military users around the world. Reliability, accuracy and safety were the main guidelines when it was developed the PMX project. The extensive use of polymer materials and light alloy metals allowed the design of a compact, lightweight yet rugged design one which is versatile and easy to deploy in combat. The major components, barrel and bolt, are machined from a special high strength steel, specifically designed to withstand the rigors of harsh environments and abusive conditions.

Product: The PMX uses a blowback action and fires from closed bolt. It feeds from a 30 round magazine and has a right-side folding stock. Beretta PMX has ambidextrous controls included the fire selector, reversible cocking handle and features a full length Picatinny top rail and 3 additional shorter rails at 3, 6 and 9 o'clock.

Colors: Black, Wolf Grey, Flat Dark Earth and Olive Drab Green

Notes: Firing mode can be selected from safety (trigger locked), single shot and full automatic. PMX features a right-side folding stock and up to 7 attachment point sling spread all over the submachinegun. PMX is also NATO qualified and can perform in all environments and adverse conditions. The extensive use of polymer makes the PMX easily shootable and light weighted.

Model	PMX
Caliber	9x19
Locking system	Blowback
Barrel Length (inches)	6,8
Barrel Lengths (mm)	175
Firing modes	Semiauto / Full Auto
Length / collapsed stock (mm)	NA
Length / extended stock (mm)	640
Length / folded stock (mm)	418
Height / with magazine & folded sight (mm)	270
Weight / with empty magazine (g)	2.500
Magazine capacity	30-20-15
Magazine material	Polimer

MX4 Storm

Product: The MX4 submachine gun is a defense and law Enforcement firearm ideal for professional use by Police Forces and special troops. Snag free rounded forms facilitate handling, shouldering and aiming; MX4 is indicated for use in narrow and space-limited places and is designed to allow an extremely quick and simple field stripping.

MX4

Product: The blowback type locking system and the bolt safety ensure reliability, great stability and precision in follow up shots. Beretta MX4 has a quickly removable, high-capacity magazine which allows rapid reloading and extended use in emergency situations.

Colors: Black, Flat Dark Earth

Notes: The extractor, the ejector and the cocking handle are easily reversible for right and left hand use. The manual safety button and the magazine release button can also be reversed from one side of the submachine gun to the other.

Model	MX4

Grenade Launchers

Product: The GLX160 is a manually operated, single-shot grenade launcher that fires low velocity 40x46mm ammunition. The GLX160 has been specifically designed to be fully integrated with the ARX160 rifle, furthermore, thanks to its fast mount attachment the grenade launcher can be easily added to any rifle provided with a proper interface. In alternative, GLX 160 can be installed on a stand-alone five-position telescopic stock that can easily be adjusted in length in order to better adapt to the shooter's requirements and measures. The GLX160 uses a slide forward configuration which makes it fully ambidextrous.

GLX160 A3

Product: The Grenade Launcher GLX 160 A3 cal. 40 x 46 mm is a lightweight, single shot, breech loaded, locked breech rotating bolt, double action only weapon which may be shoulder fired only when attached to the ARX 160 rifle or on the stand-alone stock assembly.

Colors: Black

Notes: GLX 160 A3 features a firing selector which foresees safety and firing position. GLX 160 has also a loaded chamber indicator and a safety pin that prevents firing if the is not correctly installed.
